DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of 11-14, 16-18 and 25-26 in the reply filed on 8/27/2006 is acknowledged.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 11-14, 16, 17, 25 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cruise et al (US 6,994,686) as modified by Jeanbourquin (US 6,223,936).

Cruise et al disclose in Figures 8A-D, 10, and 18 a method for delivering sealing compound comprising the steps of introducing a delivery sheath (24) having an occlusion member into a puncture; the delivery sheath connected to a pair of barrels (22) by a Y-fitting (Figure 28), wherein the sealing components are provided in the barrels by moving a valve coupled to the barrel ports for connecting the barrels with containers so as to mix buffer solutions in the barrels with solid polymer precursor components (Figure 8).

Cruise et al disclose the claimed invention except for an auto-injection assembly having an actuator activate able to release a spring mechanism. Jeanbourquin disclose in Figure 1 an auto-injection assembly comprising an actuator activateable to release a spring mechanism to automatically direct a plunger assembly to inject components out of the barrels. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the device of Cruise et al with an

Art Unit: 3767

autoinjection system as taught by Jeanbourquin, since such a modification would automate the system of Cruise et al, making it easier to use.

Allowable Subject Matter

Claim 18 is allowed.

Response to Arguments

Applicant's arguments filed 5/7/2007 have been fully considered but they are not persuasive. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., that the device "automatically delivers components, such as sealing components, from barrels without unintended pauses") are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3767

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
